

## **Allotment judging 8<sup>th</sup> September 2020**

### **1<sup>st</sup> place**

#### **Plot 7a**

The plot had a broad range of crops and flowers free from disease and damage. Unplanted areas were weed free as were between rows. Structures were well maintained along with the use of nets to control pests. It had good use of compost bins and collection of rain water. It also had good companion planting to encourage beneficial insects. Overall, a very tidy and well looked after plot.

### **2<sup>nd</sup> place**

#### **Plot 6a**

The plot had a broad range of crops and flowers that were free from disease and damage. Soil between crops was weed free. Good use of the entire plot with no wasted areas. Good use of compost bins. Overall, a tidy and well looked after plot.

### **3<sup>rd</sup> place**

#### **Plot 2a**

The plot had a broad range of crops that were free from disease and pest damage. It was tidy with little amount of weeds. Good use of space available.
